

TWO OAKS DIVERSIFIED GROWTH & INCOME FUND

CLASS A: TWOAX
AS OF: 12/31/2018

"Pursuing growth & income from diverse asset classes by utilizing common-sense investment disciplines"

DIVERSIFICATION

- * TWOAX invests in stocks, fixed income & real estate/asset based securities.
- * TWOAX must maintain a 15% to 50% exposure in each of these asset classes.
- * Over long-term investment periods our goal is to achieve reduced volatility while increasing capital and income.

POTENTIAL CASH FLOW

- * TWOAX screens potential investments for dividends and income.
- * Investments must fit our proprietary investment strategy and show the potential to grow income over time.
- * We believe income streams can allow greater flexibility to weather market volatility.

SEEKING QUALITY

- * Our investments must meet stringent fundamental disciplines based on various metrics such as revenues, free cash flow, earnings & profitability measures to be considered for investment.
- * These disciplines allow us the ability to filter through the vast investment universe and focus on securities we consider to be of highest quality.

There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses.

The performance data quoted here represents past performance. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. Please review the Fund's prospectus for more detail on the expense waiver. Results shown reflect the waiver, without which the results could have been lower. A Fund's performance, especially for very short periods of time, should not be the sole factor in making your investment decisions. For performance information current to the most recent month-end, please call 559.375.7500.

S&P 500: an unmanaged composite of 500 large capitalization companies. This index is widely used by professional investors as a performance benchmark for large-cap stocks. You cannot invest directly in an index.

Barclays US Agg.: covers the USD-denominated, investment-grade, fixed-rate, taxable bond market of SEC-registered securities. The index includes bonds from the Treasury, Government-Related, Corporate, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS, and CMBS sectors. The U.S. Aggregate Index is a component of the U.S. Universal Index in its entirety. The index was created in 1986, with index history backfilled to January 1, 1976. Source: barclayhedge.com.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Two Oaks Diversified Growth and Income Fund. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 559.375.7500. The prospectus should be read carefully before investing. The Two Oaks Diversified Growth and Income Fund is distributed by Northern Lights Distributors, LLC, member FINRA. Two Oaks Investment Management, LLC is not affiliated with Northern Lights Distributors, LLC.

Investments in Mutual Funds involve risk including possible loss of principal. There is no assurance that the fund will achieve its investment objectives. Investing in the commodities markets through commodity-linked ETFs, ETNs and mutual funds will subject the Fund to potentially greater volatility than traditional securities. There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. The U. S. government's guarantee of ultimate payment of principal and timely payment of interest on certain U. S. government securities owned by the Fund does not imply that the Fund's shares are guaranteed or that the price of the Fund's shares will not fluctuate. In general, the price of a fixed income security falls when interest rates rise. Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. The value of the mortgage-backed securities held by the Fund may go down as a result of changes in prepayment rates on the underlying mortgages. Prepayment may shorten the effective maturities of these securities, and the Fund may have to reinvest at a lower interest rate. Real estate values rise and fall in response to a variety of factors, including local, regional and national economic conditions, interest rates and tax considerations. In addition to the risks facing real estate securities, the Fund's investments in Real Estate Investment Trusts ("REITs") generally involve unique risks. REITs may have limited financial resources, may trade less frequently and in limited volume and may be more volatile than other securities. Securities within the same group of industries may decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular sector, the value of its shares may be especially sensitive to factors and economic risks that specifically affect that sector. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations.
